### Detailed Action

In response to the Amendment of 10/31/08, where claims 1-6 and 16 were canceled, the examiner withdraws the prior Office Action Rejections and includes a new rejection here over newly cited art.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-15 and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Nishiki (6,183,918).

Nishiki addresses claim 7 (see col. 4, lines 10+) - Diffraction of the ultraviolet beam P1, by the phase mask 10 produces a diffracted ultraviolet beam P2 that illuminates the photosensitive optical fiber 12. If the grating pitch of the phase mask 10 is  $2\lambda$ , then the diffracted ultraviolet beam P2 alternates between high and low intensity with a period of  $\lambda$ . The refractive index of the fiber core 16 is most greatly altered in regions 18 exposed to the high-intensity parts of the diffracted ultraviolet beam P2. A Bragg grating with a grating pitch of  $\lambda$  is thus created in the fiber core 16.

Referring to FIG. 3, the phase mask 10 may have a chirped grating 20 with a grating pitch that varies, either continuously or in discrete steps. The grating 20 can be divided into zones, for example, and a different grating pitch employed in each zone, to create a filter that extracts a plurality of wavelengths.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Applicant's arguments with respect to claims 7-15 and 17 have been considered but are moot in view of the new ground(s) of rejection.
